CRITICAL PSYCHIATRY The Limits of Madness

EDITED BY D.B. DOUBLE

July 2006 268 pages 216x138mm
Hardback ~~£50.00~~ £25.00 0-230-00128-9

Psychiatry is increasingly dominated by the reductionist claim that mental illness is caused by neurobiological abnormalities such as chemical imbalances in the brain. Critical psychiatry does not believe that this is the whole story and proposes a more ethical foundation for practice. This book describes an original framework for renewing mental health services in alliance with people with mental health problems. It is an advance over the polarization created by the 'anti-psychiatry' of the past.
